### **WORK EXPERIENCE**

# Data Analyst

## Omegasoft Technologies Pvt Ltd

01/2023 - Present EdTech (Product Analytics) Pune

- Engagement Analysis: Tracked engagement metrics and analyzed session data by cohorts to pinpoint high-potential users for targeted outreach.
- Retention Strategy: Employed cohort-based analysis to minimize drop-off rates among active subscribers, resulting in a 10% increase in retention from 32% to 42% by addressing critical user experience bottlenecks.
- A/B Testing: Conducted tests to determine users' preferred courses and proposed solutions for enhancing underperforming ones, leading to a 20% surge in subscriptions.
- **Product Analysis:** Implemented features such as course search functionality and personalized experiences for premium users.

## **Data Analyst**

# Omegasoft Technologies Pvt Ltd

01/2023 - Present FinTech (Marketing Analytics) Pune

- Maximizing Website Traffic and Bid Efficiency: Pinpointing top traffic sources and optimizing campaign conversions.
- Strategic Acquisition and Lifecycle Marketing: Profiling users, predicting consumer lifecycles, and deploying targeted campaigns for retention and advocacy.
- Dashboard Implementation: Crafting a comprehensive dashboard featuring critical KPIs such as WAU, MAU, and subscriber conversion rates, facilitating executive oversight of overarching business objectives.

# R&D Engineer- Machine Learning & Image Processing

VaaaN Infra Pvt Ltd

07/2019 - 01/2020

- Video Incident Detection System(VIDS): Developed real-time VIDS software for highway incident detection, leveraging live camera feeds on NVIDIA Jetson Nano and Tegra.
- Implemented advanced algorithms for 22% faster system speed and 17% fewer false positives, enhancing data accuracy.
- Led VIDS software deployment, achieving a significant 24% efficiency boost.

### **EDUCATION**

# Bachelor Of Technology (Computer Science & Engineering)

Banasthali Vidyapith, Rajasthan

2015 - 2019

#### **SKILLS**

# **PERSONAL PROJECTS**

#### **EV SALES DATA ANALYSIS**

- Root Cause Analysis (RCA) using SQL revealing a 14% drop in cumulative sales volume within two weeks of the launch of a newly launched EV model for a leading EV company.
- Daily sales trend analysis for a specific product model, pinpointing key sales channels for **strategic decision** making and data visualization with Excel using slicers, pivot table and charts.
- Validated and Quantified sales drop for new product variant. Implemented hypothesis for analysis.

#### CUSTOMER BEHAVIOUR ANALYSIS(Using Python)

- Employed Python alongside Pandas, NumPy, and Matplotlib for in-depth customer behavior analysis, encompassing data preprocessing, exploratory **analysis**, segmentation, and predictive modeling.
